

Project Design Phase-II
Data Flow Diagram & User Stories

Date	28 June 2026
Team ID	
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

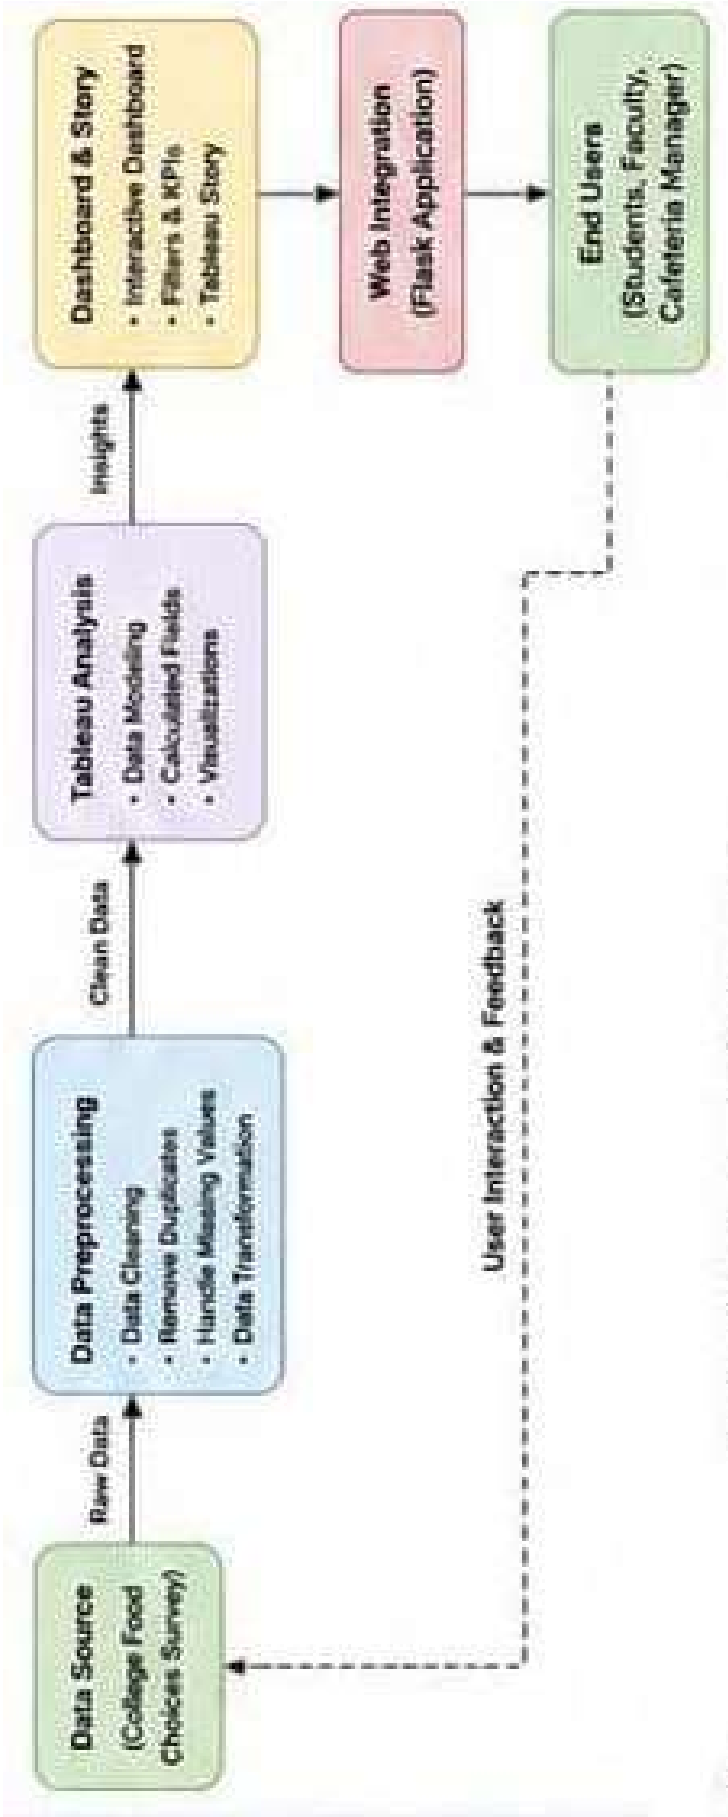

Example: [\(Simplified\)](#)

The College Food Choices dataset is collected from a reliable source and imported into Tableau for analysis.

The data is preprocessed by removing missing values, duplicates, and inconsistencies to ensure accuracy.

Tableau then transforms the cleaned data into interactive visualizations, dashboards, and stories that highlight students' dietary habits, food preferences, calorie awareness, stress-related eating behavior, and academic performance.

Users can apply filters to analyze specific categories, and the final dashboard is embedded into a Flask web application for easy web-based access and interaction.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Student	Dashboard	USN-1	As a Student, I can view the Tableau dashboard to understand dietary habits.	Dashboard opens successfully.	High	Sprint-1
Student	Data Analysis	USN-2	As a Student, I can apply filters to analyze food choices and nutrition data.	Filtered data displays correctly.	High	Sprint-1
Student	Story	USN-3	As a Student, I can view Tableau stories to understand insights.	Story pages display correctly.	Medium	Sprint-2
Administrator	Dataset Management	USN-4	As an administrator, I can update the dataset whenever new records are available.	Updated data appears in dashboard.	Medium	Sprint-2
Administrator	Dashboard Management	USN-5	As an administrator, I can maintain and publish dashboards.	Dashboard is available to users.	High	Sprint-2
