

Project Design Phase-II
Technology Stack (Architecture & Stack)

Date	28 June 2026
Team ID	
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

The deliverable shall include the architectural diagram as below and the information as per the table1 & table 2.

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	Web interface for dashboard access	HTML, CSS, JavaScript
2.	Application Logic	Process data and serve dashboard	Python
3.	Data Visualization	Create dashboards, stories and charts	Tableau
4.	Database	Store the project dataset	CSV / Excel
5.	Web Framework	Integrate Tableau dashboard with web application	Flask
6.	Infrastructure	Local system deployment	Windows, Python Environment

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	Framework used for web integration	Flask
2.	Security Implementations	Secure access to dashboard and application	Authentication & Access Control
3.	Scalable Architecture	Supports future expansion and larger datasets	Tableau + Flask
4.	Availability	Accessible through a web browser	Localhost / Web Server
5.	Performance	Fast data loading, filtering and visualization	Tableau Performance Optimization
