Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming is a creative process used to identify, organize, and evaluate ideas for solving a problem. In this project, different ideas related to college students' food choices, eating habits, nutritional intake, lifestyle factors, and academic performance were explored. These ideas were grouped and prioritized to identify the most important factors affecting students' dietary behavior. Based on this analysis, the project focuses on using Tableau to create interactive dashboards that visualize food choice patterns and provide practical dietary strategies for promoting healthier eating habits among college students.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Date	27 June 2026
Team ID	IND-01 (Individual)
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Team Collaboration

As an individual, I will take ownership of the project, from idea generation to analysis and visualization.

- ✓ Idea Generation
- ✓ Data Collection
- ✓ Data Analysis
- ✓ Dashboard Creation
- ✓ Insights & Recommendations

Problem Statement

Many college students follow unhealthy eating habits because of busy schedules, limited budgets, lack of nutrition awareness, stress, and irregular meal timings. These habits negatively affect students' health, energy levels, and academic performance. There is a need to analyze food choice patterns and identify healthier dietary strategies using data visualization.

Goal

To analyze college students' food choices using Tableau and identify factors affecting dietary habits while recommending practical strategies for healthier eating.

Objectives

- Understand students' food consumption patterns.
- Identify factors influencing food choices.
- Analyze the relationship between diet and academic performance.
- Visualize trends using Tableau dashboards.
- Suggest healthy dietary improvements.
